About

Set in 12 hectares of natural bushland, the College boasts modern, well-resourced facilities with the latest technology to enhance student outcomes. The College aims to create a climate where students can grow in their Catholic faith and where Christian values and principles are nurtured. From a strong emphasis on literacy and numeracy in Primary School through to University Entrance and Vocational Programs in Secondary School, the College provides a diverse and balanced curriculum which allows students to develop their natural abilities, to seek truth and to strive towards the highest standards of achievements. The College places strong importance on the Pastoral Care of students: their physical, emotional and mental wellbeing are a high priority.

Our online learning journey

We started using Education Perfect for Languages in 2014 and since then, as the success of the program has grown, all core subjects utilise EP for all of our Years 7-10 students and for some in Years 11 and 12. This year alone, the students have answered over a whopping 7 million questions! Incredible!

The platform is used in a wide variety of ways from homework setting, to quick tests, to designing assessments and resources, as well as for remedial work, which has proved to be a huge help for many of our students.

Why Education Perfect (EP)

Originally EP started in our Science and English departments, shortly followed by Maths, HASS & Languages. The school liked the idea of EP, as we were able to use a digital platform to supplement teaching resources used in class. Also EP serves as a function for writing modified exams across Years 8-10 and is great for setting homework tasks for our students.

“...EP supports teacher lesson planning
and is built into many curriculum tasks
with direct links through SEQTA”

Karen Hall
Head of Humanities
Mandurah Catholic College

Impact

- Students find the platform easy to access and enjoy seeing instant results.
- In Humanities and social sciences, we set pre and post quizzes in each topic and students love to see their progression in results from the start of each topic through to the end. They get quite competitive in their achievement with other students and love to see improvement.
- The platform saves teachers a lot of time on many levels, meaning more time to focus on appropriately differentiated teaching and learning methods.
