## About

Belconnen High School has been providing quality public education since 1971. Recently, the ACT Education Directorate spent \$24 million refurbishing the whole campus to make it an exemplar for 21st-century learning.

## Our online learning journey

Belconnen High started working with Google Suite in 2015.

In 2018, Belconnen High School trialled Education Perfect and subscribed to the full-suite in subsequent years.

## Why Education Perfect (EP)

We selected Education Perfect to supplement and complement our innovative curriculum. Being online allowed us to make full use of the Chromebooks issued to all students by the ACT Government both at school and for home learning.

EP was trialled by Humanities staff the first year and has been expanded across all faculties in subsequent years. Smart lessons were initially used to reinforce content taught in classrooms and as extension activities and we are now exploring creating our own content and assessment tasks using EP tools. We have been supported by the EP team at all levels with flexible professional learning delivered in groups and individually.

EP is also great for providing relief lessons in emergencies and provides us with good formative feedback on how students are tracking with content so we can deliver timely interventions.

During COVID lockdown, EP was invaluable for keeping students engaged in their learning community.

---

**“Education Perfect is a dynamic organisation focussed on providing an extensive range of easy to use tools to support educators and their students’ learning.”**

**Tina Williams**  
E-Learning Coordinator  
Belconnen High School

---

## Impact

- Our teachers spend more time on planning for student learning and less on administration tasks
  - Our students have engaging learning opportunities that support and extend their classroom
  - We have an LMS that provides instantaneous and supportive feedback to both teachers and students
