## About

Rashid School for Boys has been providing high quality education in Dubai for more than 25 years. We offer an outstanding education for Emirati students aged 3-18 years and have developed our own curriculum which combines the best of the UK National Curriculum, UAE Ministry of Education and our own courses, to provide a lively, exciting and relevant education for the future leaders of Dubai. We integrate the best of current international educational practice with a respect for Arab traditions and UAE culture. The bilingual curriculum is broad and balanced, and combines academic study with creative, physical and social activities. Every student is known and valued as an individual, and they have a moral and spiritual education that helps them develop an understanding of the contribution they will make to the global community.

## Why Education Perfect (EP) - Our online learning journey

The story is one of individual discovery and rapid professional development. We all began with learning the basics of teaching through Teams. By week 9 of our DL journey 77% of teachers were enriching the learning experience with a whole host of different educational plug ins... doceri, myon, brainpop, loom, screencast-o-matic, Britannica, Polly, Quizzizz, wordwall, kahoot, epic... But only 8% were using EP. By week 15 EP was the plug in of choice with over 60% of teachers using it to enhance the student experience.

Now that we have a hybrid approach with currently 60% onsite and 40% learning from home, EP is more popular than ever. Our third and final student report of the year is about to be published and many departments are using evidence from EP to inform achievement and progress rates.

Our latest stats show that students have spent 6,600 hours on EP this academic year and that 1,283,770 questions have been answered (and we only have 306 students!). The Departments currently using this are Maths, Geography, English Language, English Literature, EAL, Science, Economics, Moral Education, Health & PE, Arabic, DT and History.

One of the best features is that students can independently use EP for their own learning - we have a student who, from the stats, is teaching himself Japanese!

“EP has saved our teachers time; allowed teachers to easily track the engagement and work habits of the student and improved teacher's confidence in delivering online and blended learning”

**Fiona Clark**  
Head of Secondary  
Rashid School for Boys

---

## Impact

- For our students, the impact has been significant, especially in regard to improving online engagement and supporting teachers in providing personalized learning and differentiated lessons.
- With continued disruptions across the year and repeated school closures, EP ensures that the lessons and teaching does not stop. It has allowed students to quickly receive timely and meaningful feedback and teachers were able to easily track student engagement and progress.
- We have seen improved student independence, and the large range of subjects and resources on EP fosters the student's curiosity and self-learning.
