

Inquire. Analyse. Act.

Dedicated to improving student achievement

EdPotential is web-based software that enables schools to inquire into assessment data, analyse it to identify strengths, gaps and opportunities for growth; and then act to target solutions that improve learner outcomes.

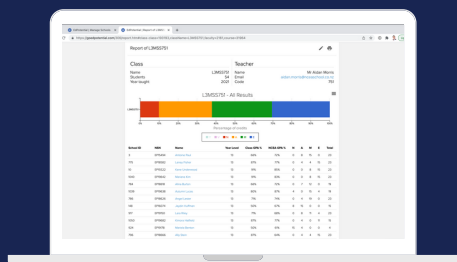

Why EdPotential?

“Aggregate and Analyse any Student Data”

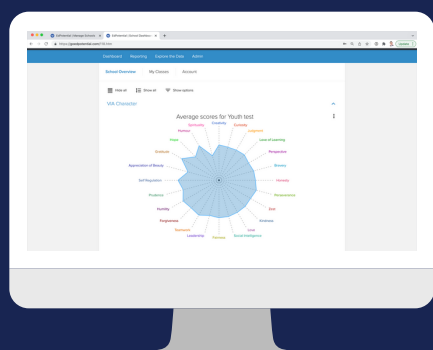

An Intuitive Data Analysis Tool

The intuitive web interface, developed for schools in consultation with schools provides a 360-degree view of the student through interactive dashboards and visualisations.

Personalised Learning Pathways for Every Student

EdPotential allows principals, management teams and teachers to work collaboratively to identify and share effective pedagogical approaches helping all students.

Comprehensive

EdPotential data analysis provides insights on student progress across subjects, classes, demographics and benchmarking against national and international norms.

Flexible

It works seamlessly with any school management system, can analyse data from any qualifications assessment system, and can be customised for attendance analysis, socio-emotional learning, stakeholder survey results or wellness data.

Benefits

"Putting School Data to Work"

Improve Student Learning and Achievement

Recognise issues school-wide to target the right solutions for academic improvement.

Early Student Intervention

Identify and act on individual student results for additional support or recognition in a more timely manner with near real-time data.

Enhance and Improve Teaching Practices

Provide teachers with evidence of how their teaching is impacting their students' progress so they can adjust and reinforce teaching practices.

Greater Consistency in School Practices

Identify effective assessment practices and implement them across the school.

Save Time and Money

Say goodbye to manual, error-prone reporting with more time spent improving educational practice and less time spent wrestling with data.

What makes edpotential so effective?

Ingest data from multiple sources

Data is automatically transformed and quality checked

Data is presented in an easy to use way

Reports and analysis accessible via secure cloud service

Users can collaborate, share and interact with accurate data

Underlying data and charts can be exported for further use

Data is a Journey, Start Yours Today!

Why Us?

“We enable schools to improve student outcomes whilst saving teachers time”

Every school collects and manages massive amounts of data. Research has proven whether it's student success, teacher effectiveness, or school teaching practices, data-driven insights are key to knowing what's really going on in a school.

We realise every school is unique, but students' achievement is a common thread and primary focus for most. We also understand data is a journey and typically schools lack the time or the resources to collect school data from multiple sources, simultaneously - such as SMS data, learning management system (LMS) data, and data from assessment platforms - to achieve meaningful analysis that can be acted upon.

EdPotential, a spin-out company from University of Wellington (Faculty of Education) and Macleans College, developed a revolutionary, cloud based student data platform that enables schools to quickly and easily analyse their student and school data in one place. Fully managed and customisable, EdPotential displays graphs and visualisations in near real-time allowing school leaders and teachers to have access to student and school data when and where they need it.

Education Perfect and EdPotential are now part of the same family, affording our schools deeper insights from brands you've come to love and trust!

Testimonials

WESLEY COLLEGE

Staff have more time to collaborate together and make strategic educational decisions based on the data, rather than spending time producing the data.

Anne-Louise Szujda

Head of Assessment and Student Reporting

ST CUTHBERT'S COLLEGE

We have gotten results out so much faster than last year which is great!

Cheryl Crabbe

Student Performance Data Manager

TAMAKI COLLEGE

The fact I can get an oversight of the school in one place, makes my job a lot easier.

Russel Dunn

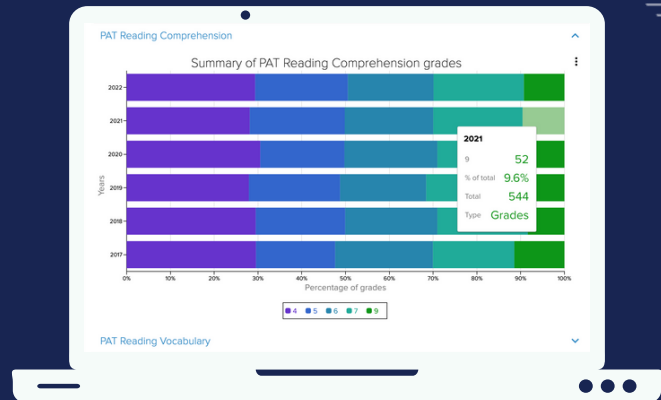

Deputy Principal

Research-Based

Research supports the idea that analysing assessment data - and acting on the findings - is one of the best ways for schools to improve student achievement. But although schools have been collecting data for decades, they typically lack the time or resources to analyse this potentially valuable information in a useful way.

EdPotential is a revolutionary solution that enables schools to quickly and easily analyse their assessment data in an in-depth, insightful way that supports reflection and decision-making, and improves teaching and learning outcomes.
