Built by teachers, for teachers

Here at Education Perfect [EP], we recognise that, with classroom sizes, student diversity and teacher shortages, it's more difficult than ever for educators to personalise student learning paths, address knowledge gaps, and track individual growth. Our toolkit is designed to empower teachers with the support, insights and content necessary to effectively meet student needs.

More than an online resource, EP is a comprehensive set of learning, assessment and analytics features meticulously created to bolster pedagogical practices and enable effortless differentiation. It is proven to deliver better student outcomes.

We also understand the financial demands that resources can place on a school's budget. That's why we offer a streamlined, multi-faceted, and dynamic solution that allows costs - and digital tools - to be consolidated.

Aligned with the various curricula taught across Australia, our offering is tailored to students from Years 5 to 12, ensuring every lesson is relevant and engaging. Each lesson is informative and captivating and keeps students hooked from start to finish. Our platform offers customisable content, adaptive learning programmes, data analytics, and deep insights into student progress and achievement.

Our secure database is only accessible by school teachers and students with top-notch security

measures in place. Your peace of mind, student privacy, and safety are our priorities.

EP has been supporting educators for over 15 years, used by over 5,000 schools and 1.8 million students globally. As we grow, we are conscious that our technology is most powerful when paired with authentic human connections. We believe in openness, collaboration, and equitable access to all education.

As a platform built for, with, and by teachers, we hope you join us in shaping future classrooms.

You're welcome to discuss EP teaching ideas with us anytime. We're always working to improve the platform, developing it into an easier, more powerful teaching and learning tool for our fellow teachers.

One platform...

to deliver effortless differentiation

Engaging learning

EP's lesson experience and engagement features support explicit instruction, blended learning, gamification and student autonomy with:

- Curriculum-aligned lessons and assessments teachers can assign to students
- Multimedia and interactive elements such as audio-visual, gamification features and tools support multiple means of expression and represent thinking
- Access for students to explore content independently anytime, anywhere
- The ability for teachers to create their own content

Growth tracking

Our assessment and growth tracking capabilities empower teachers to gain deeper insights into student learning and make data-driven decisions to personalise learning with:

- Formative and summative assessment tools to understand student strengths and weaknesses and track growth towards learning objectives
- Sequences of work aligned to curriculum outcomes
- Ability to collect different types of data, such as lesson and assessment insights into mastery and completion, as well as student reflections
- Ability to provide instant feedback or prompt peer-to-peer feedback

Personalised learning

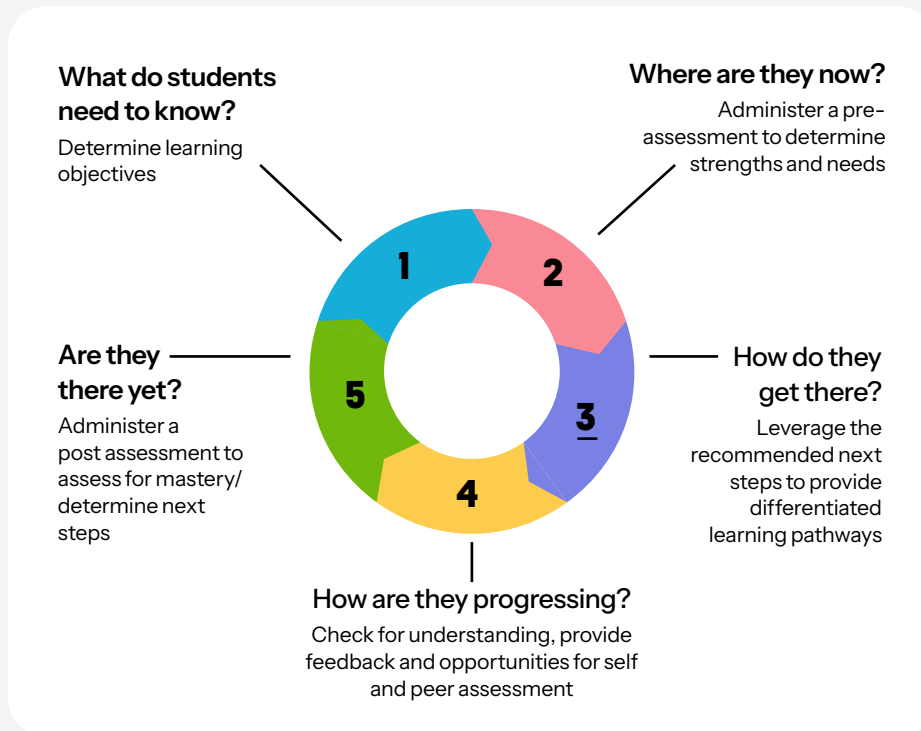

EP empowers teachers with a range of features to help them create personalised learning experiences for students.

These include the ability to:

- Personalise insights and get instant learning recommendations
- Deliver automatic consolidation
- Assign work to individuals or groups
- Customise content and learning opportunities
- Create differentiated learning pathways for each class and student

One platform...

to power an adaptive learning cycle

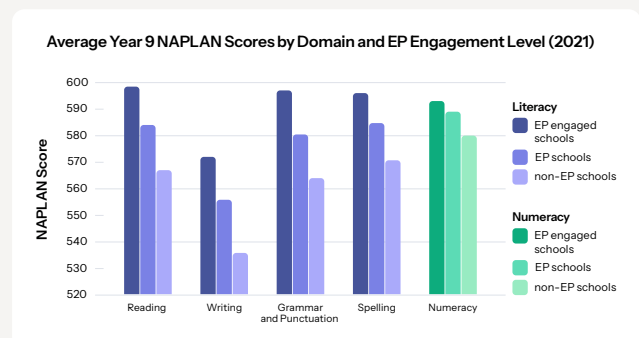

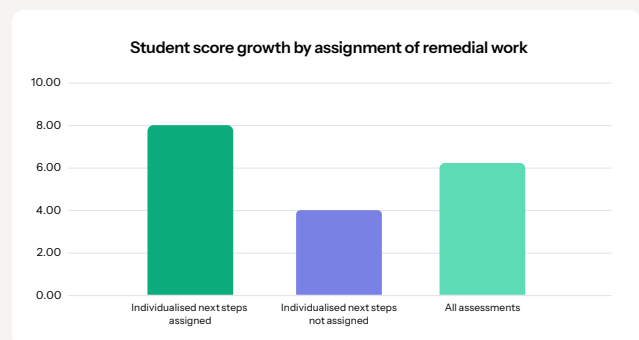

EP powers a data-driven learning cycle that focuses on the continuous evaluation of student progress against learning objectives. The platform seamlessly integrates instructional and assessment practices to guide students towards mastery.

Proven results

Our adaptive learning cycle is not only easy to implement - it is also proven to have a positive impact on student outcomes.

By analysing over 40,000 pre- and post-tests completed over a 17-month period, EP has an evidence base to determine that student learning growth doubles when students are assigned individualised next steps through EP. The average improvement between pre- and post-test was eight percent when individualised next steps were assigned to students, compared to just four percent when they were not assigned*.

EP also has a proven impact on Naplan results. Year 9 NAPLAN results in 2021 show a clear correlation between schools that used EP and higher test scores, with an even stronger effect for schools that are highly engaged with EP*.

One platform...

to let you teach your way

EP is committed to keeping teachers at the centre of our technology. This means that EP can be used to bolster pedagogical best practices in the classroom. No matter how you choose to teach, EP ensures you're well-equipped. EP supports practices including:

- Explicit instruction
- Blended learning
- Flipped learning
- Gamification
- Independent learning
- Project-based learning
- Hybrid learning
- STEM

At the centre of this ethos is our robust, evidence-based learning design. All EP lessons are created by local teachers and have been rigorously tested in the classroom. Our curriculum design team constantly reviews and updates materials to ensure they are relevant and up-to-date.

Our lessons draw from:

- Bloom's Taxonomy
- Rosenshine's Principles of Instruction
- Black and Wiliam's Assessment for Learning
- Hattie's Visible Learning

Clear learning intentions

Learning Objectives
The purpose of this lesson is to **explore** and **write** our own narrative poems.

At the end of this lesson you should be able to:

- **identify** the key elements of a narrative poem;
- **classify** the key elements of a narrative poem;
- **analyse** the key elements of a narrative poem;
- **compose** a narrative poem.

Model answers and clear explanations

Points system to promote engagement

Rank	Name	Points
1st	Jade G	2,410 pts
2nd	Ivy J	2,084 pts
3rd	Neena D	1,955 pts
4th	Rose C	1,700 pts
5th	Isabella M	
6th	Sienna C	
7th	Lauren A	
8th	Bridget M	1,503 pts

Questioning to ensure understanding

Read the sentence below and use your knowledge on **particles** and **changing states** to answer the questions.

As the bonds between particles are broken, the substance begins to turn from a solid into a liquid. While the state change is occurring, the temperature of the substance does not increase.

The name of this process is... This is because...

Small, carefully scaffolded chunks

Feedback and repetition until mastery achieved

One platform...

for all subjects

We're from the classroom, we know the pressures and challenges. That's why all of our content is fully aligned with local curricula and we have specific features designed to support different subjects. This means that your students are learning what they need to know, and you can customise the content further to your precise needs, knowing that the learning outcomes will meet national standards and that your students have the relevant tools to effectively present their thinking, show their knowledge and stay engaged.

The benefits of one platform for all subjects

Students: have greater engagement when there is ONE tool for all learning and assessment. Engagement fosters independent learning which means pedagogy methods, such as flipped learning, are enhanced.

School leaders: are able to drive greater operational efficiency - less need for teacher training, lower maintenance overheads and more efficient budget allocation.

Teachers: previously had an unseen view of the whole student, consolidated resources across all subjects, means you get more insight into a student as a whole and can make better decisions about their strengths, weaknesses and next steps.

English

- Comprehensive curriculum coverage of the Year 5-12 English curriculum, including skills-based lessons on literacy development, spelling lists, figurative language, and poetic devices
- Thematic lessons with localised content by award-winning authors that delve into plot, theme, setting, and characterisation and engage students
- Customisable lesson plans to align with your novel or film study

Humanities

- Interactive content, model answers on extended response questions, ThingLink interactive images and text-to-speech features
- Clickview integration allows for the integration of video content into lessons
- A variety of curriculum-aligned learning content, both global and localised, designed by Humanities experts that support a range of pedagogical approaches

Digitech

- Enable students to work collaboratively in a rapidly changing world, developing critical, creative thinking skills
- Curriculum-aligned learning tools designed by Digitech experts
- Interactive elements allow students to practise skills developed throughout content, including coding with scratch

Maths

- Comprehensive curriculum coverage from Years 5-12, complete with scaffolded lessons that incorporate a range of visual aids
- Interactive lessons allowing students to enter line-by-line working for mathematical calculations and answer detailed questions on the platform in both numerical and written form as well as a visual graphic calculator (Desmos)

Health & PE

- Vocabulary lists and an interactive multi-modal revision package to allow repetition, practice, and gamified learning.
- Aural content with native speaker recordings allows students to hear the correct pronunciation and improve their own.
- Thematic content makes learning relevant, engaging, and effective.

Languages

- Comprehensive coverage of the Year 5-12 curriculum for various languages, including interactive, multi-modal lessons and vocabulary lists to allow repetition, practice, and gamified learning
- Aural content with native speaker recordings allows students to hear the correct pronunciation and improve their own
- Thematic content makes learning relevant, engaging, and effective

Science

- Comprehensive curriculum coverage of the Year 5-10 science curriculum as well as Year 11-12 Biology, Chemistry, Physics and Psychology courses, allowing students to advance and specialise in areas of strength and progress at their ability level
- Multimedia-supported contextual lessons that provide interactive simulations, visual aids, video support and a range of question types to improve scientific understanding
- Over 120 science investigations that include a full method, model answers, and pre-populated RiskAssess templates

EAL

- Comprehensive use of multimedia tools, including voice recording, video clips, and various audio tasks, to facilitate pronunciation practice
- Individualised assessment for differentiated learning pathways with immediate feedback and automated reporting
- Self-paced learning through scaffolded lessons, levelled vocabulary, and language lists

In good hands

Accredited learning design

- Validated by Johns Hopkins University
- Certified as a Digital Promise Product
- Possesses a Safer Technologies 4 Schools security certification
- Content is clearly scaffolded and follows robust pedagogical principles
- Delivers lessons and activities optimised for student success

Partnered with the best

- We invest in strategic partnerships with world-class EdTech providers to deliver a seamless customer experience
- You can expect a no-fuss setup, easy login, optimised reporting and maximised security and reliability

So much more than just EdTech

Unparalleled support

Our in-house experts are on hand to help you through your EP journey.

We offer:

- Personalised implementation support
- Bespoke professional development courses and events
- Individualised teacher consultant for each school to plan your pedagogical approach to online learning
- In-platform messaging for feedback and support
- A cloud-based platform that is accessible from any device

Innovation & partnership

We're proud to be built for, with, and by teachers... and to be leading the way in EdTech.

Joining EP, you get access to

- Pedagogical thought leadership
- Up-to-date insight into the latest EdTech trends
- Assurance you'll always be one step ahead with the latest innovations, such as AI
- All the latest developments
- Options to join advocacy groups, where you can provide direct feedback to our development team and be the first to trial state-of-the-art EdTech in your class

Community

Our tech and services are backed by our community.

“With the implementation of new and improved features Education Perfect is becoming a fantastic tool for classroom and home learning use. Monitoring progress is simple, randomised tests are a great assessment tool and the interaction students have with each other in the online setting is a great motivator”

▶ Julia Brain from Warrnambool College in the teacher community

“We have loved using Language Perfect (Education Perfect) for a number of years now. The students enjoy the World Championships, in-school competitions and the interactive activities, and our language teachers are super impressed by not only the efficient and friendly service provided by the lovely EP support team, but the ever-improving resources and assessment tasks available for us to use for our formative assessment in the classroom and to set as homework.”

▶ Bronwen Calcraft, HOD Languages Ravenswood School for Girls, Sydney

The EP difference

Education Perfect (EP) is a comprehensive digital toolkit. It combines learning features, assessment technology and insightful analytics to support high-impact instructional practices for teaching and learning, enable effortless differentiation and deliver better student outcomes.

- Whole-school solution: With extensive subject coverage, specific features for many subject areas, and analytics providing detailed school-level tracking, EP customers can effectively optimise classroom differentiation by taking a whole-school approach.
- Whole-feature solution: While some platforms focus their offering more on learning, assessments or analytics, EP has an advanced offering across all three feature sets. Integrating these capabilities into one platform is the key to powering a strong, adaptive learning cycle.
- Flexible: While many platforms have a fairly prescriptive offering, the EP platform can be tailored to meet the needs and preferences of individual educators, supporting them to 'teach their way'.
- Grounded in learning science: We pride ourselves on delivering lesson content and

technology that is evidence-based and rigorously tested.

- Built-in partnership: With over 15 years in operation, many ex-educators on staff, and a continued focus on working with our customers to deliver what matters most to them, we understand what matters most to our community.
- Your safety is our priority: Our data security and privacy measures are best in class. Our comprehensive approach means that your school and students are protected at every level.
