

The EP Starter Subscription

For New Zealand primary schools – Years 4-6

The Perfect Package for Primary Schools

With comprehensive out-of-the box assessments and learning recommendations following the 'Understand -- Know - Do' framework, it's easy to start gathering essential data about your students' strengths and areas of improvement. Our goal is to ally with you in the classroom to help each individual student reach their full potential.

- Identify and address student knowledge gaps at scale
- Gain a complete line of sight on student progress towards curriculum outcomes
- Access quality learning content for enhanced in-class teaching

Aligned to Te Mataiaho for Maths & Languages

Lessons and assessments are available for NZ Primary Years 4-6.

About Us

Education Perfect (EP) is the leading EdTech platform designed to help every teacher help every student reach their potential. Developed by teachers, for teachers, EP is used by over 1.8 million students and 50,000+ teachers in more than 5000 schools across the globe.

Your Trusted Partner

As a highly accredited EdTech provider, we offer educators:

- Industry-leading safety, privacy, data protection and security features
- Best-in-class platform performance and reliability
- An accredited learning design
- Integrations and partnerships with world-renowned EdTech providers
- Unparalleled customer support and community engagement

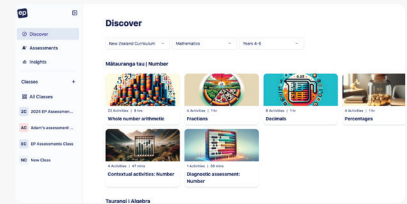

Amplify your teaching practices with curriculum-aligned data.

How It Works

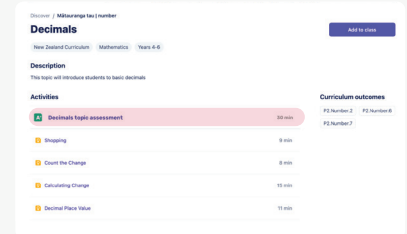

Discover Topics

Our platform offers comprehensive coverage of curriculum topics. Each topic contains a curated sequence of lessons and a 'topic assessment', all of which are aligned to a specific set of curriculum outcomes.

Identify Learning Gaps

'Topic assessments' can be assigned to students. Students then securely carry out their assessments and upon completion, receive their results. Each assessment question directly aligns to a lessons within the topic, providing you with immediate student insights.

Immediate Targeted Intervention

Our learning recommendations, generated from assessment insights, enable educators to instantly address students' knowledge gaps and personalise next-steps.

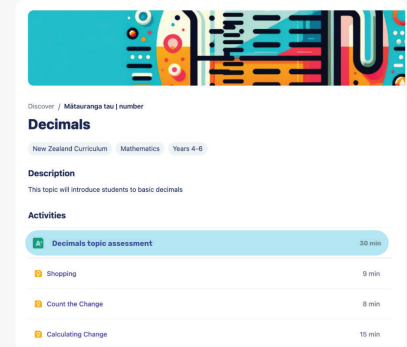

Track and Report on Progress

Our downloadable mastery and completion reports allow you to easily track student progress towards curriculum goals. Our 'compare assessments' feature also allows you to track and measure growth over time.

Enhance Learning

Now that you have a deeper understanding of every student's skill level, you can meaningfully utilise the 'lessons' within your current EP topic. Each lesson directly relates to a specific question in the assessment and allows you to address common problem areas. Lessons are developed for front-of-class instruction, are robustly designed around pedagogical best practice, and are proven to increase student engagement.
