Curriculum Alignment Summary: Ontario: Grades 6-9 English & Language

Education Perfect content blends technology with pedagogical best practice and curriculum content to power a differentiated teaching and learning cycle.

Our English & Language lessons are designed to be used as part of a scope and sequence, while allowing teachers the flexibility to adapt these to their own classroom practices. They work together with topic assessments that empower teachers and learners with impactful classroom data, providing an understanding of prior knowledge and skills, tracking learning growth over time and supporting the creation of customizable courses.

Each English & Language lesson is designed to meet the varied needs of teachers and students in the classroom. The lessons create opportunities for whole-class discussion, as well as independent and group study, and stretch tasks. EP English & Language lessons provide a clear framework with learning goals and success criteria, following a "gradual release" model. Students are supported to succeed through modelled examples, guided practice, and scaffolded questioning that allows for formative feedback. The platform's English & Language content uses a lexicon that is familiar to those in Ontario. Each lesson includes optional Minds On and "exit ticket" activities, relevant and engaging text resources, and the opportunity for self-reflection. Our content is inclusive, accessible, and reflects the unique lived experiences of all learners.

Overleaf is a summary of our vision for EP English & Language which we are continuing to build and release throughout the 2025-2026 school year. This incorporates both lessons and topic assessments.
